

Scholarships and fellowships available for the students in the Environmental and Water Engineering Postgraduate Programme

Students registering to the above programme for year 2019 leading to MSc/MScEng will be eligible for following scholarships and fellowships.

1. Scholarship for a full-time needy student

Three scholarships amounting to a total of about Rs. 600,000/- per each are available from the NORAD sponsored Water and Society Project of the University of Peradeniya for a needy student who is selected to register to follow the MScEng/MEng programme on full-time basis. Preference will be given to a student from a marginalized group, if any, and/or a female student. Application form is attached below. Interested students are requested to submit completed scholarship application together with the application for the programme.

2. Fellowships for full-time and part-time students

- a) Fellowships are available for 2 students to follow a 3 weeks long summer course in the University of Life Sciences in Norway during July 2019. Students are selected based on a performance of a test during the programme. These fellowships are sponsored by NORAD Water and Society Project
- b) 3 to 6 months long fellowships to conduct collaborative research study for 6 -8 students in the following foreign institutions: Bangladesh University of Technology, Institute Technology Cambodia, University of Nairobi in Kenya, Makerere University in Uganda, Addis Ababa University in Ethiopia. Interested students are offered these fellowships during the programme.
